

Our process

Using our step by step process, our dedicated design and planning team will help navigate you through the building, planning and approval process right through to completion at final handover. We take care of everything so you don't need to as part of the PURE experience.

We will guide you through our pre-sale process where we will go through all the compliance and permit processes involved in your unique project. Once we have this part completed our team will inform you of the shipping costs and transfer you over to a formal contract proposal. This will include the terms of payment, shipping terms, warranty and all specification details. Payment options will be confirmed and a deposit will be taken.

After the deposit is taken, our team will begin production in our factory as per the time agreement in contract. Finally, the shipping process will begin and the final key components will be delivered and assembled on site.

Location Check

- Building permits
- Shipping quote

Signing the Contract

- Contract includes: Terms of payment, shipping terms, warranty, specifications

Payment

- Payment options to be confirmed
- Deposit taken

Production in Factory

- Estimated production time as per agreement

Installation

- Shipping of final key components to be assembled on site (Studio model only)
